A timing drive belt is a transmission belt made from elastomers, having a flat outer surface with a number of teeth on the internal surface, widely used in internal combustion engines to control the valve timing. The belts are generally made from rubber with high tensile fibers, such as Kevlar or fiberglass, running through it. However, rubber's poor resistance to high temperatures has led to ...

V-Belts - Gates Corporation

A serpentine belt is a relatively long, flat, multi-ribbed belt that is driven by the engine's crankshaft pulley. The belt drives many, and often all, of the engine accessories such as the alternator, air conditioning compressor, power steering pump, water pump, and air pump. The serpentine belt is tensioned by a hydraulic or spring-loaded ...
