ID2CNC - Build your CNC by your own | Indiegogo. I don't know about the new machine, but the old one was horrible. I bought one and it sucks bigtime. The parts were not machined well, there are parts that weren't designed properly and didn't even fit together at all without modification. Even the motor mounts were ill-conceived.

### BUILDYOURCNC PLANS PDF

And it's a lot of bang for your buck! With a working area of 24"x48", you can build this for a lot less than the cost of a similar commercial CNC router. A compact router, Baltic birch plywood, some basic hardware, and an off-the-shelf electronics kit are all you need to build your own computer-controlled router. This project is ideal for tech-savvy woodworkers looking to add a CNC router to their shop or beginners who want to give this type of woodworking technology a try.
